Fire Safety and The IoT Masters Academy

Build trust in fire safety products

AGENDA

YOUR AGENDA

Over the coming weeks you'll join like-minded professionals, industry peers and BSI security experts for a series of online discussions, articles and information designed to help you overcome roadblocks, whether you're developing a connected fire safety product, already have one on the market, or just want to understand emerging regulation and embrace new opportunities.

15th September

ONLINE PANEL DISCUSSION FIRE SAFETY AND IOT MASTERS ACADEMY

In this live panel discussion we will introduce the legislation from the IoT and domestic fire safety perspective, and explore key challenges facing the industry to meet the requirements and adopt IoT technology.

CHECKLIST DON'T LEARN THE HARD WAY: 5 LESSONS FOR YOUR IoT GAME PLAN

We analyze some of the biggest brands IoT successes and failures to bring you recommendations on how to overcome top security challenges.

POINT OF VIEW PANEL DISCUSSION REPORT

Read the observations, discussion and insight from the panel discussion, sent to you in a digestible report.

4

THE MANUFACTURER VIEW

INTERVIEW / CASE STUDY

We share the challenges and the steps that manufacturers are taking to maximize the power of the IoT.

ONLINE LIVE Q&A

YOUR QUESTIONS ANSWERED AND WHAT'S NEXT

This online Q&A gives you the opportunity to ask our BSI experts your questions and consider 'what's next?' in your IoT adoption journey.
