GET CONNECTED • CYBER SAFE

The future of cybersecurity for the fire industry

GREAT SECURITY STARTS WITH COMPLETE AND CONTINUOUS VISIBILITY OF EVERY ATTACK SURFACE

INFRASTRUCTURE
AS CODE

CLOUD

IT

AD

OT

CONTAINER

APPS

NETWORK

UNDERPINNED BY AI/ML & DATA ANALYTICS

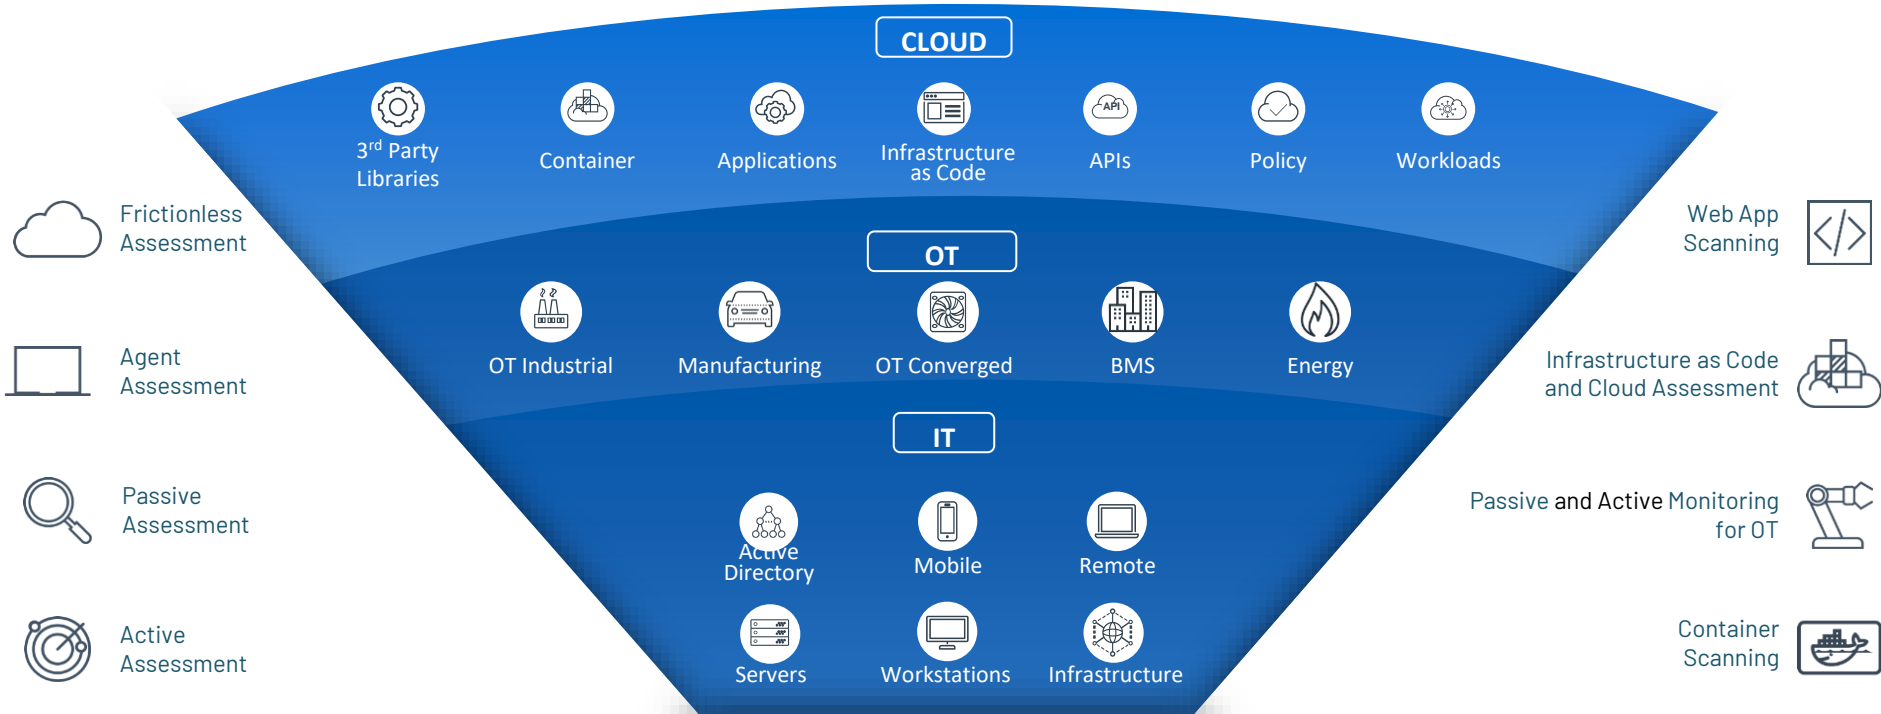

METCLOUD

GET CONNECTED • CYBER SAFE

VISIBILITY OF THE MODERN ATTACK SURFACE

With adaptive approaches to assessing assets and devices across the infrastructure

DISRUPT ATTACK PATHS

Initial Foothold

via Phishing or Flaw

Explore

Lateral movement
across the target
environment

Elevate

Gain privileged
access to the Active
Directory Domain

Evade

Hide forensic
footprints

Establish

Install code for
permanence

Exfiltrate

Extract data and hold
target to ransom

SEE every flaw in the attack path across your entire infrastructure - from end-point errors, Active Directory Accidents, Web-App mishaps to clumsy Cloud configuration.

PREDICT the flaws likely to be used to gain access and privilege within your business

DISRUPT the paths attackers take by proactively addressing the flaws before they are leveraged

METCLOUD

See everything. Predict what matters.

Managed in the Cloud.

METCLOUD Cyber Exposure Platform provides actionable insight into your entire infrastructure's attack surface.

METCLOUD

Get the operational technology security you need. Reduce the risk you don't.

METCLOUD.OT protects industrial networks from cyber threats, malicious insiders and human error. With threat detection and mitigation, asset inventory, vulnerability management and configuration control, METCLOUD's ICS security capabilities identify and predictively prioritize threats and vulnerabilities to maximize the safety and reliability of your operational technology environment.

The screenshot displays the 'Controllers' section of the METCLOUD interface. It features a sidebar with navigation options: DASHBOARD, EVENTS, POLICIES, INVENTORY, CONTROLLERS (selected), NETWORK ASSETS, RISK, NETWORK, GROUPS, REPORTS, and LOCAL SETTINGS. The main area shows a table of 125 items, categorized into two groups: Rockwell (2) and Schneider (12). Each row lists a controller name, its risk score (indicated by a colored square), IP/MAC addresses, family, firmware, location, and last scan time.

NAME	RISK SCORE	IP/MAC	FAMILY	FIRMWARE	LOCATION	LAST SCAN
Rockwell (2)						
Assembly Line_A #12	10	192.168.9.137 192.168.5.95	CompactLogix	28.011	Production Floor A	2 minutes ago

WHY METCLOUD

Award Winning

Award winning AI/ML cloud platform

Sophisticated AIOps

Cyber Surveillance

Threat Intelligence

Singular Vision

Market leading Risk-Based Vulnerability Management technology and pioneering Cyber Exposure to help customers measure & reduce cybersecurity risk

Technology Leadership

Advancing modern cybersecurity – from IT to OT, Cloud to Container
