

Fire Industry Association

Leading Excellence in Fire Since 1916

Environment Policy

Statement of Policy

The FIA is the largest fire protection trade association in Europe with 1000+ members. We are a not-for-profit organisation and a major provider of fire safety training.

Our objective is to promote, improve and perfect fire protection & firefighting methods, devices, services, and apparatus. We achieve this through the representation of our members, providing technical support, guidance, and opportunities for professional advancement through education and appropriate regulation.

We are committed to protecting the environment and will continually strive to attain a satisfactory balance between environmental, social and economic responsibilities.

To accomplish this, we will proactively:

1. Protect the environment by promoting environmental awareness to industry stakeholders from the design, development and production to the service and distribution of products. Including, where practicable, the use of environmentally friendly materials, the recycling of waste materials, and the distribution of environmentally friendly products.
2. Comply with all applicable compliance obligations (including environmental legislation and regulations) and any other requirements imposed by legislation, members, and stakeholders.
3. Strive to prevent pollution and continually improve our environmental performance against all significant aspects and priorities of the association.
4. Establish an Environmental Management System and review environmental objectives.
5. Provide relevant and practical information, instruction and training to members and employees who may impact the environment.
6. Produce and make publicly available our environmental policy.
7. Review the policy annually and report on the findings of the review

This policy applies to all employees, visitors, contractors and/or suppliers to FIA and associated activities and functions.
