### **FIA ARC sign FAQ's**

- This sign should only be used if there is an active contract with an ARC confirmed with your installer.
- The information should be either on a label attached to the panel or on a sign affixed close to the panel.
- The contract with the ARC is between your installer/maintainer company. Any questions regarding the ARC contract contact your installer/maintainer.
- Contact details for the ARC should not be included with the sign.
- In order to reduce the risk of false alarms, the signal should be taken "off watch" when doing a weekly test and you should confirm with the ARC that the signal has been received.
